

At the bottom of this view are the East General Offices<sup>1</sup> at Third and Buchanan Streets. The ring-shaped building above them is Machine Shop No. 4<sup>2</sup>. To its right are the Central Tool buildings<sup>3</sup>.

Blast Furnaces "A" and "B" are visible at the upper right. The two buildings<sup>5</sup> above the machine shop and left of the blast furnaces are used for storage. A third, smaller building<sup>6</sup> mostly hidden behind the lower of the two buildings was part of the original machine shop and foundry complex built circa 1867.

The cleared area<sup>7</sup> at the upper left once contained Open Hearth Furnaces No. 3 and other storage buildings.
